

Worldwide Access to Buyers and Sellers

AMERICAN AIRCRAFT SALES, INC.

AMERICAN AIRCRAFT SALES, INC.

Helping You Stay Ahead of Your Competition

Executive aircraft shrink the world for you and keep you in touch with growing markets. Since 1968, clients have turned to American Aircraft Sales, Inc. to help them stay on top of the shift to faster turboprops and jet aircraft. AASI has grown into a prestigious aircraft brokerage firm, matching buyers and sellers around the world.

The foundation of our sales capabilities is our computer database of information. This database contains pertinent information about every executive aircraft manufactured, anywhere in the world. This computerized research tool gives you valuable insight into changing market trends. You can be certain that you will receive the best possible value and a realistic market price for your aircraft.

Making the Right Moves at the Right Time

In this fast-paced industry, the experience of AASI makes all the difference in the world. For our customers, this experience means that regulatory procedures are handled promptly and accurately, thereby preserving your most valuable asset - your peace of mind. AASI customers tap expert knowledge of the legal, technical and financial aspects of aircraft sales. Whether you are buying or selling an aircraft, this expertise smoothes difficult negotiations and protects everyone involved in the transaction.

There are dozens of ways to present an aircraft to the market and dozens of decisions to make.

The continued success of AASI depends on making the right decisions. Upon request, we will provide a list of satisfied customers worldwide. Our best endorsements come from our customers. Our continued success depends on having you as a satisfied customer.

Creating Maximum Impact for Your Aircraft

For every aircraft we list, we develop a targeted approach to make maximum impact on prospective customers. Through years of experience we have learned how to evaluate advertising opportunities in trade and consumer publications. Our well-thought-out strategies eliminate the risk of overexposure and avoid the stigma associated with aircraft that languish on the market.

Sellers receive this market savvy and save the expense of advertising, attracting qualified buyers. Leads are developed into sales with complete presentation materials, which may include color brochures, photographs, technical documentation as well as personal contacts. Before we incur the expense of a demonstration, we'll make sure a deposit is in escrow and a written commitment in hand.

Giving Aircraft Interiors Exciting New Looks

It takes a special array of skills to create luxurious, functional interior designs. And it takes more than a knowledge of furniture and finishings – it requires a deep understanding of the demands of air transport to know what works in the confined environment of an aircraft.

When you select an aircraft, or need to upgrade or refurbish your cabin space, we can arrange professional design and completion services. Professional, experienced interior service centers will blend modern and traditional materials to express your unique personality, and your special requirements.

Controlling Your Aircraft Acquisition Cost

There's no need to delay upgrading your corporate transport while you sell your existing aircraft. Not only can we market, present and sell your aircraft, we can take your existing aircraft in trade and add it to our inventory.

We are immediate cash buyers of any corporate jet or turboprop, and can even offer brokerage aircraft at our cost in exchange for your trade-in. With our access to sources of financing, we can help you expedite the paperwork. That may include insurance, as well as other documentation required by lenders.

**We earned our reputation by making
the right moves at the right time.**
